

## AIRFIELD OPTICAL BENCH AND CLINO CALIBRATION

### Calibration Contracts

Quality costs are as important as any other area in your company budgets. Spreading costs throughout the year on a calibration contract saves you money. Also, scheduling your requirements will enable us to save you time as we can forward plan your needs and give you quick turn around schedules.

### Calibration and Certification of Clinometers

All equipment and standards used within the laboratory are traceable to recognised national standards including directly to the National Physical Laboratory. Therefore the confidence in measurement gives assurance in quality.

All types of airfield clinometers, mechanical, optical and electrical inc:

- ADB
- Alstom
- Research Engineers
- Thorn
- Idman

Certification is fully traceable and is undertaken at a UKAS / NAMAS approved test facility.

### Research Engineers PAPI Projectors

- Optical check and re-adjustment, using a 'Research Engineers' Optical Bench
- Visiting service to check, re-align and minor repairs of projectors using original equipment
- Reconditioned projectors available
- Exchange service of ready to use projectors
- Certificate of conformity with each re-aligned / repaired unit
