

CALIBRATION AND INSTRUMENT SERVICE CENTRE

Calibration Contracts

Quality costs are as important as any other area in your company budgets. Spreading costs throughout the year on a calibration contract saves you money. Also, scheduling your requirements will enable us to save you time as we can forward plan your needs and give you quick turn around schedules.

Calibration

Virtually every type of instrument / gauge can be covered by our facilities, including mechanical and electrical / electronic gauges, ie:

- Clinometer
- Analogue and Digital Multimeters
- Oscilloscopes and other equipment

The Laboratory we use is fully approved by amongst others: U.K.A.S, NAMAS, Rolls Royce, British Aerospace, the lab is also: BS EN ISO 9002, U.K.A.S, approved to certificate the following:

- Angle Plates
- Comparitors
- Dial Test Indicators
- Digital Indicators
- Dividing Heads
- Electrical Gauges
- Gap Gauges
- Micrometers (ext and int and hgt)
- Parallels
- Plug Gauges
- Projectors
- Ring Gauges
- Rollers
- Sine Bars
- Sine Tables
- Spirit Levels
- Square Straight Edges, etc..

All equipment and standards used within the laboratory are traceable to recognised national standards including directly to the National Physical Laboratory. Therefore the confidence in measurement gives assurance in quality.
